Floor & Wall: Color Body Porcelain Stoneware

Arte BG, Arte BI, Arte MA

Abrasion Resistance: Class IV – Tile in this class may withstand heavier amounts of traffic with greater amounts of dirt and/or other abrasives present, including commercial kitchens and areas with regular traffic from the outside. See Coefficient of Friction and Frost Resistance for installation-specific details.

Natural inspiration defines this veritable work of **ARTE**. Petrified wood's graining, texture and realistic variations provide the inspiration, you become the artiste. Use these multi-sized, rectified, porcelain modules to form either intricate patterns or bold expanses of nuanced color across floors and walls, countertops and backsplashes, indoors and out. Ease of maintenance, enhanced durability and ADA-compliant slip resistance are all part of the package.

Subtle striations of beige, white and brown float atop a three-dimensional ridged texture that lends tactile appeal as well as reflective lightplay. The impulse is to touch the surface; the reaction is pleasant surprise as the wall or floor finish serves not only as a palette for other design elements, but also as an integral part of the design construct itself.

Sizes from large to small, shapes from rectangular to square are precision-cut from durable, frost-resistant color-body porcelain. Complementing the diverse mix are a 13"x13" brick mosaic and single bullnose that permit a myriad of detail and finish options.
