06.19.09

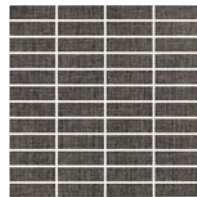

High-end inkjet technology gives a hand-crafted feel to the multiplicity of elements in **TEXTILE**. The strength and hardness of color body porcelain embraces the softer world of fabric. From soft to structured surfaces, from geometric to metallic patterns, this extremely tactile series gives architects, designers and consumers a decidedly different approach to coordinating wall and floor treatments.

Neutral shades of grey, brown and beige make the large-scale, rectified linen-look field tile a dignified backdrop for horizontal or vertical surfaces. But that's only the beginning . . . stacked mosaics for each color, multiple decos ranging from damask to lamè to rattan textures plus complementary single bullnose add the final, personalizing touches to any space.

Bring this rich artistic experience to public or private areas using the multiple components in innovative, "it's all about me" ways that express creativity, design excellence and durability.
